FOREST FIRES
LANDSCAPE
RESTORATION

# **AGENDA**

### Forest Fires Landscape Restoration

In a moment the world is unified in the restoration largest effort ever through the Bonn Challenge, this past summer a historically unprecedented forest fire scathed over 600,000 hectares of land in Chile.

The Chilean NGP Participants Mininco and Arauco now facing the challenge of recovery, restoration and mitigation of future fires, called with WWF Chile, for a NGP study tour to see how they can learn from others and provide some new answers to these pressing landscape problems.

NGP will provide
you moments
where to build your
empathy and trust,
to feel free to
express your
views, and to be
prepared to listen
to and learn from
those of others

#### NGP Study Tour

NGP brings together people from different backgrounds, with different interests, to share their knowledge, experience and views, to listen, and to reflect on and question their own attitudes and actions.
